

6-Pack Puzzles No. 1

AKARI

A lamp placed in a white cell will light up all cells in its row and column up to the edge of the puzzle, or the first black cell. All cells must be lit, but no lamp may light up another lamp. Numbers in black cells tell you how many lamps touch that cell, vertically and horizontally.

DOMINO

3	0	3	2	1
1	3	3	3	0
1	2	2	1	0
2	1	2	0	0

A set of dominos from 00 to 33 have been laid out horizontally and vertically into a rectangular array. Draw a line around pairs of numbers to show the location of each domino. There is a single unique solution, and no guessing is required.

FILLOMINO

Place numbers in the blank squares so that the puzzle is divided into zones with the area of each zone equal to the number contained within its squares. The zones may take on any shape, but zones having the same area may not touch each other.

GOKIGEN

Place a diagonal line in each square of the puzzle. The circled numbers indicate the number of diagonals which must converge at that point. The diagonal lines must not form a closed loop of any size.

KAKURO

This is a crossword puzzle which uses numbers instead of letters. The clue for each 'word' is the sum of the digits which make up that word, and all clues are included within the body of the puzzle. Keep in mind that there are no repeated digits within any word.
